CONTENTS

(COMMON ORAL SESSION : March 2, Northwest ballroom 1)

Subject	First Author	Title	page
KEY NOTE SPEECH	**Geoff MEADEN**	GIS in Fisheries Science: Foundations for the New Millenium	**3**
GENERAL	**Tony BOOTH**	Debunking the myth that a GIS is a glorified mapping tool	**4**
	P. HAVERLAND	Aquatic Restoration and Conservation (ARC) Partnership for Marine, Estaurine, and Freshwater Living Resources: A GIS tool for fisheries and Habitat Management	**5**
EDUCATION	**Vincent GALLUCCI**	The University of Washington's Approach to GIS: an example of a tool to facilitate interdisciplinary research and teaching.	**6**
SOFTWARE	**L. PURCHASE**	Ocean Data and Fleet Operations Management System (ODFOMS) *(software is also demonstrated in the demo Session)*	**7**
	John Power	A Spatial Data Management and Reporting System for Canada's West Coast Shellfish Program *(software is also demonstrated in the demo Session)*	**8**
	Craig SOPER	Kai Tahu Customary Fisheries Management *(software is also demonstrated in the demo Session)*	**9**
	Patrick SIMPSON	FishTrek: Putting GIS into the Hands of the Fishing Fleet *(software is also demonstrated in the demo Session)*	**10**
	L. HENDRICKSON	An Assortment of Arc/Info Applications for Marine Fisheries Management *(also presented by poster)*	**11**
	A. D. GOMONOV	Computer technologies for environment monitoring and fisheries management *(software is also demonstrated in the demo Session)*	**12**
	Dale KIEFER	A 4 Dimensional Oceanographic Information System *(software is also demonstrated in the demo Session)*	**13**
	Philip HOOGE	The Animal Movement Program: Integrating GIS with statistical analysis and modeling of animal Movement	**14**
	M. KENDZIOREK	Development an ArcView GIS application to assist in the management of Essential Fish Habitat **(MAP1)**	**15**

(MARINE ORAL SESSION: March 3- morning , Northwest ballroom 1)

Subject	First Author	Title	Page
ARTIFICIAL REEF	**Wen-Miin TIAN**	Positioning of Offshore Artificial Reefs	**16**
DATABASE	**Francis MARSAC**	GAO: a software linked to oceanographic databases and dedicated to fisheries science	**17**
FISHERIES OCEANO-GRAPHY/ ECOSYSTEM	**Sei-ichi SAITOH**	An Application of Marine GIS and DMSP/OLS Visible Images to Study on Migration Dynamics of Pacific *Saury Cololabis saira* off Sanriku, Northwestern North Pacific	**18**
	Jeffrey RODGERS	The North Pacific Rim Salmon Ecosystem Project **(MAP2)**	**19**
	Boris TROTSENKO	Dynamically Active Zones of the World Ocean and Fish Abundance	**20**
	Alid PENA	Study of spatial dynamics of Jack Mackerel fishing grounds and environmental conditions using a GIS	**21**
	E. LOGERWELL	Mapping of survivor's habitat of pelagic fish off California	**22**
	Chris MATHEWS	Interactions between frontal systems, upwelling, El Nino and the small pelagic fisheries of the Bali Straits, Lombok Straits, Alas Straits and Sepi Straits, Indonesia	**23**

(MARINE ORAL SESSION: March 3 - afternoon, Northwest ballroom 1)

Subject	First Author	Title	page
BYCATCH	**Robert MIKOL**	GIS as a Bycatch Reduction Tool *(also presented by poster)*	**24**
	Robert ACKLEY	Using GIS to manage Alaska's groundfish fishery bycatch	**25**
ASSESSMENT/ PREDICTION/ METHODS	**Juan PERTIERRA**	Using a GIS platform for the compilation of demersal specie's biomass indices off Catalan coast, NW Mediterranean Sea	**26**
	Boris TROTSENKO	Multilevel Informational-Forecasting System in Fishery Sciences and Fisheries Dynamically Active Zones of the World Ocean and Fish Abundance	**27**
	Christine FIRMAN	A Survey Design for Integrated Monitoring of Oregon Coastal Salmonids	**28**
	Tom NISHIDA	Spatial dynamics of southern bluefin tuna recruitment	**29**
	John WALDEN	Integrating GIS and mathematical programming models to assist in fisheries management decisions *(software is also demonstrated in the demo Session)*	**30**
	Tony BOOTH	Integrating age-structured stock assessment within a GIS framework	**31**
	Fabio CORSI	Integrating GIS and Surplus Production models: a new approach for spatial assessment of demersal resources?	**32**

(INLAND ORAL SESSION: March 3 - morning, Evergreen room 3)

Subject	First Author	Title	page
HABITAT	**Mindi SHEER**	A comparison and current and historical salmon habitat in a section of the John Day Reservoir, Columbia River	**33**
	S. SRIVASTAVA	Arrangement of habitat inventory information on GIS platform to identity optimum and degraded Areas of endangered fish *Tor putitora* habitat **(MAP3)**	**34**
	Barry THOM	The Basinwide Prioritization of Stream Habitat Enhancement Sites In Western Oregon	**35**
	Peter RISSLER	Using GIS and GPS to map the seasonal distribution of Independence Valley speckled dace and tui chub	**36**
	Kim JONES	Spatial Patterns of Aquatic Habitat in Oregon	**37**
	C. WITTKUGEL	Geographical mapping of spawning areas of fish in the littoral zone of Lake Constance - Long term changes	**38**
	Anthony CHEONG	Interpretation of Reconnaissance Fish and Fish Habitat Inventory Data for BC	**38/39**
MANAGE-MENT	**Charles MINNS**	The Role of GIS in Area Fish Habitat Management Plans in the Great Lakes Basin	**39**
	Martin HUDSON	Where the wild fish are: documenting salmonid presence and use for effective management	**40**
	Vladimir BABAYAN	GIS "Fishery Resources of Russia" *(software is also demonstrated in the demo Session)*	**41**

(INLAND ORAL SESSION: March 3- afternoon, Evergreen room 3)

Subject	First Author	Title	page
ASSESSMENT/ ESTIMATION	**Susan DOKA**	Raster-based thermal habitat suitability analysis for selected freshwater fish **(MAP4)**	**42**
	Michael WING	Display and Analysis Methods for Aquatic Habitat Data *(also presented by poster)* **(MAP13)**	**43**
	J. WANZENBOCK	GIS supported assessment of fish stocks in Austrian lakes	**44**
	Jill HARDIMAN	Integration of Juvenile Chinook Salmon Location Estimates and Water Velocities to Assess Migration Behavior in the Forebay of Bonneville Dam, Columbia River	**45**
	Conrad TOEPFER	Impacts of land use on stream habitat for the threatened leopard darter	**46**
	William FISHER	Estimating the Abundance of Stream Fish Populations Using Geographic Information Systems Technology	**47**
	Kelly BURNETT	GIS in the coastal landscape analysis and modeling study (Clams) : A prototype application to predict juvenile salmonid summer use and habitat from landform and landuse data	**48**
	Sharon CLARKE	Building Foundation Spatial Data Layers for Aquatic Analyses **(MAP5)**	**49**
	J. UNDERWOOD	Hydrologically enhanced high-resolution digital elevation models	**50**
	Jim KAPETSKY	Strategic Assessments of the Potential for Increasing Fish Production from Inland Waters	**51**
	Joshua VIERS	Aquatic conservation strategies and the Navarro River watershed: applied GIS for TMDL decision support	**52**

(MARINE ORAL SESSION: March 4 – morning , Northwest ballroom 1)

Subject	First Author	Title	page
HABITAT	**Stephen BROWN**	Identifying and Assessing Essential Fish Habitat Using GIS **(MAP6)**	**53**
	Michael PARKE	Identifying Essential Fisheries Habitat with GIS: Problems and Prospects in the Central Pacific	**54**
		(cancelled : this page is not included)	**(55)**
	Rosidi ALI	Introduction and application of the Marine GIS : In Understanding the Spatial Distribution of Marine Fish Resource in the Southeast Asia Region: A Case Study in the Exclusive Economic Zones of Malaysia	**56**
	Christopher PERLE	GIS Applications to Map and Manage Fish Habitat: The Highly Migratory Species Example	**57**
MANAGE-MENT	**Steven EDWARDS**	Ecosystem Management of Fishery Resources in the Northeast Shelf Ecosystem: Evidence from GIS Analysis of Fishery and Environmental Data on Georges Bank	**58**
	Alvaro ABELLA	Use of GIS for the analysis of spatial data on fishing effort and seasonal changes in fishing strategies for Tyrrehenian Sea bottom trawl fisheries	**59**
	Frank AUGUST	Vessel Monitoring and GIS in Fisheries Enforcement	**60**
	Dan URBAN	Problem Solving in Western Alaskan Fisheries Using GIS	**61**

(WATERSHED/AQUACULTURE ORAL SESSION: March 4 - morning, Evergreen room 3)

Subject	First Author	Title	Page
WATER-SHEDS/ ESTUARY	**Geoffey HABRON**	Integrating social and ecological suitability in a community-based, spatially explicit, adaptive watershed conservation program	**62**
	Stuart HAWTHORN	The Digital Watershed Atlas – Creation and Use **(MAP7)**	**63**
	Jorge Campos	Management Of A Tropical Fishery And Watershed For The 21st Century: The Gulf of Nicoya, Costa Rica.	**64**
AQUA-CULTURE/ MARI-CULTURE	**Munir AHMED**	Identification of Shrimp Pond and Waterbody in Coastal Area of Bangladesh	**65**
	Michael PORTER	Water quality analyses in commercial catfish ponds using GRASS (Geographic Resource Analysis Support System)	**66**
	Ken COOPER	The Application of GIS to Commercial Aquaculture *(also presented by poster)*	**67**
	M. BEL HASSEN	A GIS Assessment of Aquacutural Nonpoint Source Pollution in the Fier d'Ars Bay **(MAP8)**	**68**
	Tony BOOTH	Identifying potential areas for mariculture in South Africa: A GIS approach	**69**

(COMMON ORAL SESSION: March 4 - afternoon, Northwest ballroom 1)

Subject	First Author	Title	page
REMOTE SENSING	**Hidetada KIYOFUJI**	Analysis of Japanese common squid fishing boat distribution around Japan by DMSP/OLS visible data	**70**
	Boris TROTSENKO	Development of Methods for Assessment and Forecasting of the State of Marine Ecosystems in the Fishing Areas of the World Ocean on the Basis of Cosmic Monitoring Data	**71**
	Eric ROGERS	Remotely-Sensed Data Products For the Fisheries: A review and synthesis of over 10 different data sources and their potential use in the fisheries	**72**
	Tony BOOTH	Assessment of kelp biomass off the west Cape coast of Southern Africa using RS/GIS methods	**73**
	M.B. SHATOSHIN	Creation and develop of air-cosmic monitoring system of Russian fisheries	**74**
	Nina Maggi KELLY	Spatial Pattern of Forest Clearing in Watersheds Containing Essential Fish Habitat for Pacific Salmon *(software is also demonstrated in the demo Session)*	**75**

(POSTER SESSION: Northwest ballroom 2)

Subject	First author	Title	page
SOFTWARE	**Haolan HUANG**	A Web-based GIS System for Fisheries Research	**78**
	Steve W. ROSS	Developing a geographic information system for the North Carolina coastal reserve program **(MAP9)**	**79**
	L. FORTUNATI	Interactive viewer of information on catch, effort, fleet and fishing grounds	**80**
	Ilkka Kylmänen	Physical habitat mapping by the ground penetrating radar	**81**
	Herve DEMARCQ	CUSSI: a software for managing satellite data in coastal upwellings areas for fisheries management in a GIS context **(MAP10)**	**82**
	G. MOISEYENKO	Use of GIS to analyse the activity of catching vessels	**83**
	Janet SMOKER	Distribution of seabird bycatch by North Pacific longline fleet	**84**
	Laurence BYRNE	Evaluating a New Management Boundary on Two King Crab Stocks in the Aleutian Islands	**85**
	Christine ATYEO	The development of a GIS to aid sustainable management of the Australian South East Fisheries	**86**

(POSTER SESSION: Northwest ballroom 2)

Subject	First author	Title	page
MARINE	**Atle TOTLAND**	BEAM – An interactive GIS application for acoustic abundance estimation **(MAP11)**	**87**
	Gordon WARING	Characterization of beaked Whale (Ziphiidae) and sperm Whale (*Physeter macrocephalus*) summer habitats in shelf-edge and deeper waters off the Northeast US	**88**
	Janet BENSON	From Sampling Fish Larvae to Spatial Analysis: Development of a GIS	**89**
	Laura VIDAL	Spatially structured model of the Gulf of Mexico Ecosystem: An approach to use mapping information for fisheries management	**90**
	A. J. BOOTH	Spatial analysis of chokka squid *Loligo reynaudii* within a GIS framework	**91**
	A. J. BOOTH	The use of a GIS to understand the spatial and temporal biology of the chokka squid *Loligo vulgaris reynaudii* on the southeast coast of South Africa	**92**
	Daniel SHEEHAN	Thermal Cost-Path Modeling of Atlantic Salmon Ocean Migrations	**93**
	Mark BAIN	Aquatic Gap Analysis: Demonstration of a Geographic Approach to Aquatic Biodiversity Conservation	**94**
	Scott SOWA	The Missouri Aquatic Gap Pilot Project; a multi-agency GIS Tool for Assessing Missouri's Aquatic Resources.	**95**
	Deborah BLOOD	Analysis of Ichthyoplankton Abundance, Distribution, and Species Associations in the Northeast Pacific Ocean and Bering Sea	**96**
	Sharon D. LOY	Accessing Forty-five Years of Trawl Survey Data from the Gulf of Alaska with a GIS	**97**
	Janet MASON	Sidescan sonar mapping of benthic trawl marks on the shelf and slope off northern California: a comparison with fishing effort	**98**
	Catherine COON	Spatial patterns of commercial bottom trawl effort: “hot spots” in the Gulf of Alaska and Aleutian Islands	**99**
	Herve DEMARCQ	The VIBES project : combining a fishery GIS with 3D and individual-based models **(MAP12)**	**100**

(POSTER SESSION: Northwest ballroom 2)

Subject	First author	Title	Page
INLAND & OTHERS	**Michael G. WING**	Geostatistical Analysis of Large Woody Debris Distribution in Streams	**101**
	John A. YOUNG	Assessing spatial patterning of in-stream habitats using GIS	**102**
	Paul GENOVESES	Desktop Geographic Information System for Salmonid Resources in the Columbia River Basin	**103**
	Geoffrey MATHEWS	Tracking created coastal salt marshes of Spartina alterniflora with the help of a GIS **(MAP14)**	**104**
	Gary SMITH	Integration of Acoustic Seafloor Classification Systems with GIS for the Assessment of Estuary Oyster Habitat	**105**
	Christoph WITTKUGEL	Spawning abilities and quantity of northern pike (*Esox lucius* L.) in Lake Constance	**106**
	Vermitz BOURDAGES	Use of a GIS to quantify habitat disturbance adjacent to streams and analyze the impacts on resident fish	**107**
	K. CUNNINGHAM	Measuring the effects of reservoir operations using GIS **(MAP15)**	**108**
	Noble HENDRIX	Crayfish distribution as a function of hydrology in Everglades National Park	**109**
